

Modern Solutions for Sustainable Cities

Webinar

Moving toward creating sustainable cities achieves many advantages to the human's life, community services, environment, economy, and many more that will make the country successful to provide a safe and modern life to the people. There are many solutions needed to be applied to make our cities sustainable. In this Webinar, the Arab Union for Sustainable Development and Environment and the Sustainable Solutions for Consultancy and Training, Kuwait, organise a virtual webinar on modern solutions for sustainable cities. The webinar aims to exchange relevant information, best practices, and lessons learned and advance regional initiatives toward achieving sustainable cities. This event is prepared and coordinated by Eng. Salem Alajmi, Board member at Arab Council for Sustainable Energy, and will be held virtually on 16 June 2021 at 7:00 pm Kuwait time, 4:00 pm GMT.
