

Energy Efficiency in Buildings a Component in the Whole Energy System

Birger Lauersen
Vice President

Final energy consumption by sector EU-28 - 2016

EU - Energy Efficiency in building policies

1. Energy Performance of Buildings Directive
 - EU countries to establish stronger long-term renovation strategies
 - European scheme for rating the smart readiness of buildings
 - Requirements on the installation of building automation and control systems
2. Energy Efficiency Directive
 - Metering and billing information to consumers
 - Promotion of efficiency in heating and cooling with CHP and waste heat
3. Smart Finance for Smart Buildings initiative

Why District heating and cooling?
